Become the Conductor.

The AI is your orchestra. This guide gets your course installed in about five minutes.

AI Mastery Course • Install Guide

WHAT YOU'RE UNLOCKING

A personal AI teacher, built from scratch.

No hype — just a course that adapts to you and builds toward something real.

You become the conductor

Claude is your orchestra. You direct it — every output, every tool, every automation. The course teaches you how to lead.

Real leverage

Learn to hand the repetitive work to AI — emails, research, planning, building — and get hours of your week back.

No ceiling

Most people use a fraction of what Claude can do. The course starts wherever you are and never runs out of next lessons.

What is a Skill?

Think of it like installing an app on your phone — except you're installing a teacher. A really good one, that knows exactly how to teach YOU.

Without the Skill

- Claude starts fresh every conversation
- No memory of where you left off
- Generic answers — not built for you
- You're on your own figuring it out

With the AI Mastery Skill

- Claude becomes your personal AI teacher
- Tracks your progress lesson by lesson
- Adapts to how YOU learn, at your pace
- Builds toward what YOU want to create

1

Create your free Claude account

Good news: the course now works on Claude's FREE plan. You don't need to pay anything to start.

Go to claude.ai → Sign up → Verify your email

Free plan — start here

- Full course works on Free
- Upload skills, take lessons, build things
- Daily usage limits — fine for 1-2 lessons a day

Pro (\$20/mo) — when you're hooked

- Much higher usage — longer sessions
- Access to more advanced features as you level up
- Cancel anytime. Upgrade later — not required today

2 Save your course file

You received a file — this IS the course. Save it somewhere you can find again.

ai-mastery-class.zip

AI Mastery Course · by Andrew Austin

It's a ZIP file — don't unzip it. Claude takes it exactly as-is.

Desktop

Easiest to find later

Downloads

Where files usually land

Any folder

You choose — just remember it

3

Flip one switch in Settings

Skills won't work without this — it's the step most people miss. Takes 20 seconds.

1

Click your initials / profile icon

Bottom-left corner on desktop, top-left menu on mobile

2

Open “Settings”

From the menu that appears

3

Click “Capabilities”

In the settings menu

4

Turn ON “Code execution and file creation”

Flip the toggle — that's it

Direct link: claude.ai/settings/capabilities

4 Install the course

Customize → Skills → “+” → Create skill → Upload a skill

- 1 Open “Customize” in the left sidebar, then click “Skills” Direct link: claude.ai/customize/skills
- 2 Click the “+” button, then “Create skill” → “Upload a skill” A file picker opens
- 3 Select **ai-mastery-class.zip** and upload Claude reads the course automatically and shows a summary
- 4 Make sure the toggle next to it is **ON** Off means Claude ignores the course completely

Can't see Skills? Go back to Step 3 — code execution must be ON first. Upload error? Make sure you're uploading the ZIP, not an unzipped folder.

5

Start your first lesson

Open a new chat and say any of these:

“Teach me Claude”

“Start my AI class”

“Let's do Lesson 1”

“I want to learn AI”

What happens next: Claude greets you, learns how you like to learn, and starts Lesson 1 automatically. No setup, no confusion. At the end of each lesson, Claude gives you a Progress Snapshot — save it, paste it next session, and pick up right where you left off.
